

Clear and Careful Information Technology

All websites, social media and data shows

Benefits many groups in our community:

- Disabled people, particularly people using assistive technology or screen readers.
- Older adults less familiar with being on-line.
- People with slow internet connections.
- People using mobile devices.

Clear and careful Information Technology offers -

All information available to read on-line and able to be listened to.

Information explained in plain language.

Good colour contrast of text on screen.

Avoid use of flickering images that can trigger seizures.
